Professional Summary:

Backend-focused Developer with hands-on experience building scalable REST APIs, authentication systems, and cloud-deployed applications. Experienced in backend architecture, asynchronous request handling, database optimization, and production deployment workflows. Interested in backend infrastructure, platform engineering, and AI-integrated systems.

Technical Skills:

Languages	Python, SQL, JavaScript
Backend & Frameworks	FastAPI, Django, PostgreSQL, SQLAlchemy ORM, Pydantic, JWT Authentication
Cloud & DevOps	AWS(EC2, S3), Docker, Nginx, Linux, Git, GitHub Actions
Core Concepts	REST Architecture, API Design & Integration, Authentication & Authorization, Async Processing, Database Design, Deployment Pipelines

Projects:

WearIt – Production-Ready E-Commerce Platform

Scalable Backend: Built a high-performance REST API using FastAPI, PostgreSQL with JWT authentication and Role-Based Access Control (Admin/User).

Containerization: Containerized the frontend, backend using Docker Compose.

CI/CD Automation: Configured GitHub Actions CI/CD pipelines to automatically deploy application updates.

Production Security: Deployed Nginx as a reverse proxy with Let's Encrypt SSL certificates for HTTPS routing.

Digital Noticeboard System – Centralized Notice Management Platform

Developed a **Django-based** notice management platform supporting notice publishing and document sharing. Implemented search functionality and category-based filtering for easier access to academic information. Configured deployment workflows on Render for automated updates and streamlined delivery.

Kanban Board – Task Management Platform

Built a Kanban-style task management application with drag-and-drop workflow tracking and customizable boards. Persistent task storage, and responsive UI for seamless cross-device usage.

Education:

B.Tech in **Computer Science & Engineering** from Laxmi Institute of Engineering & Technology (LIET)

CGPA: 8.24 (Current 5th Sem)

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs

Training & Certifications:

DevOps Training (Upflairs Pvt Ltd): Practical training covering Docker, CI/CD concepts, Linux and Cloud Deployment.

Python Specialization (FreeCodeCamp & TuteDude): Focused on advanced Python programming and core backend development.

Data Analytics Training (Upflairs Pvt Ltd): Practical training on real world data cleaning, extracting insights and visualization by PowerBI.

Industrial Readiness Training Program: Improving Communication and Presentation skills

Hobbies & Interests:

IoT Projects and Automation

Video Editing & Technical Content Creation.
